

Global Renewable Energy Insurance

Harnessing the elements of expertise

Market leading Renewable Energy Insurer

As the world's leading renewable energy insurer, we have an in-depth understanding of the renewable energy industry. Our expertise and global reach delivers protection at every stage of development, from planning and construction through to operation.

Worldwide energy demands are expected to increase by 50% over the next 20 years and the renewable energy industry is evolving rapidly to meet these needs. Investment in renewable energy sources is growing at an unprecedented 30% per annum. Projections suggest that more than £360 billion will be invested over the next five years alone.

"This is a dynamic industry that is developing at pace.

We provide tailored solutions that protect the development of new projects and minimise the risk of downtime once the plant is in operation. Our claims service offers support 24-hours a day, 7 days a week. By providing investment security on a global scale we are committed to supporting the renewable energy industry as it moves forward.

We have over 25 years experience in providing insurance and risk management solutions for wind, bioenergy, solar and hydro operations, insuring projects across Asia, Australasia, Europe, Latin America and North America. With our protection, I'm confident that our customers can turn this market into an exciting business opportunity."

Ken Norgrove, CEO, Global Renewable Energy.

Unrivalled understanding

Our customers include insurance brokers, manufacturers, developers, contractors, operators and finance companies who are driving the renewable energy industry forward. We have underwritten projects for some of the largest companies and the most innovative developers in the world. Today, we are the market leader in renewable energy insurance in many countries worldwide.

Underpinning our success has been an unrivalled understanding of the renewable energy industry and the

needs of our customers. From project delays and supply chain difficulties through to machinery failures, downtime and rising equipment costs, we have been there to share our expertise and offer protection.

We offer tailored insurance solutions for the wind, bioenergy, hydro-electric power and solar energy markets. Our “end to end” proposition covers design, construction, pre commissioning, operation and inspection and is backed up by a comprehensive claims service.

Global expertise delivered locally

Our Renewable Energy team brings together the largest number of renewable energy insurance experts in the world including over 300 engineers and renewable energy underwriters.

By combining our specific industry knowledge with local market understanding we create global solutions that can be delivered across Royal & SunAlliance's worldwide network. With our proposition and commitment to the sector, you can be sure our solution protects your interest at every stage of development, from plan to construction through to operation.

At Royal & SunAlliance, our loss adjustors and specialist engineers focus on risk management, control and speedy claims resolution. Whether the project involves single or multiple sites, we can provide the global coverage to meet your needs.

We will work in partnership with you to create insurance solutions tailored to your requirements.

Royal & SunAlliance is one of the world's leading multinational insurance groups. Our purpose is to help our customers protect themselves against the risks they face - as we have done for nearly 300 years.

We transact business in more than 130 countries. We have 20 million customers around the globe and approximately 24,000 employees.

Royal & SunAlliance is a FTSE 100 company, listed on the London Stock Exchange.
